

Further to the launch of the GUARDIAN™ Personal Tracking device, Altech Netstar now offers a service called Guardian SOS.

Guardian SOS is an affordable emergency location and response service, which runs on Altech Netstar's software, downloaded to your JAVA/GPS/GPRS compatible mobile phone.

The service allows you to raise an SOS panic alert through a mobile application on your mobile phone. When raised, it will send an alert to Altech Netstar's emergency centre as well as three preset emergency contacts.

Altech Netstar's emergency control centre will be able to identify the exact location of the panic signal using GPS technology¹, and will establish the nature of your personal emergency. The famous Altech Netstar ground and air recovery teams will respond to your emergency if required.

Guardian SOS Features

- An affordable and easy emergency response service
- Dedicated application shortcut can be assigned to Guardian SOS for easy access. (Refer to the handset specifications of your mobile phone.)
- When the tracking has been activated, the whereabouts of loved ones can be accessed through a web based application
- Software downloaded to your mobile phone. No additional device needed
- Available on all mobile networks

Guardian SOS Benefits

- This service includes the famous Altech Netstar tracking and recovery service (optional).
- Peace of mind knowing that help is available at the push of a button in case of emergency.
